Hungarian Supply Installation Northeast of NagytetenyEVALUATION  PLACE OBTAINED  25X1DATE OF CONTENT DATE OBTAINED  DATE PREPARED 23 September 1954REFERENCES PAGES 1 ENCLOSURES (NO. & TYPE)  25X1REMARKS  25X1This is UNEVALUATED

1. On 13 May 1954, a tent camp, about 2 kilometers long was located on the eastern bank of the Danube River northeast of Boelcske (Y 6/N 34). About 100 tents, 3 or 4 wooden sheds with towing vehicles parked in front of them, and an unidentified number of trucks, about 12 of which were loaded with pontoons, were observed in the camp area. Soldiers moved about the area and worked at the tents and on the motor vehicles. An undetermined number of pontoons and boats were located on the bank, and other boats, some of which had outboard motors, were fastened to the bank where soldiers serviced their motors. Other boats and motor boats which were occupied by soldiers wearing fatigue uniforms with garrison caps travelled on the Danube river. One of the motor boat had a small rectangular white flag which showed the Hungarian national colors in the upper left hand corner.

2. On 12 May 1954, a four-story warehouse which was about 30 meters wide was served by a railroad spur and guarded by sentries, was seen on the western bank of the Danube River about 4 kilometers northeast of Nagyteteny (Q 48/H 41).

Comment. The engineer training ground near Boelcske has been known previously. It was also occupied by numerous troops in the summer of 1952.
